****Please continue to visit the project website listed below for future updates on the overall corridor.***

Phase 2A Construction Schedule:

The first portion of Phase 2 to be constructed is almost complete. Work will continue with intermittent lane closures to finish landscaping and other punch list items. Thank you for your patience during construction!

Phase 2B Construction Schedule:

Final design is continuing for Phase 2B at the intersection of Arrowhead Parkway and Veterans Parkway.

The City is working on the environmental review and approvals. The project was planned for 2024 and will be pushed to late 2024/2025 to coordinate with other projects in the area. Right of way coordination is progressing.

The project involves a full closure of Veterans Parkway and Arrowhead Parkway intersection and will be constructed over two years.

Phase 3 Construction Schedule:

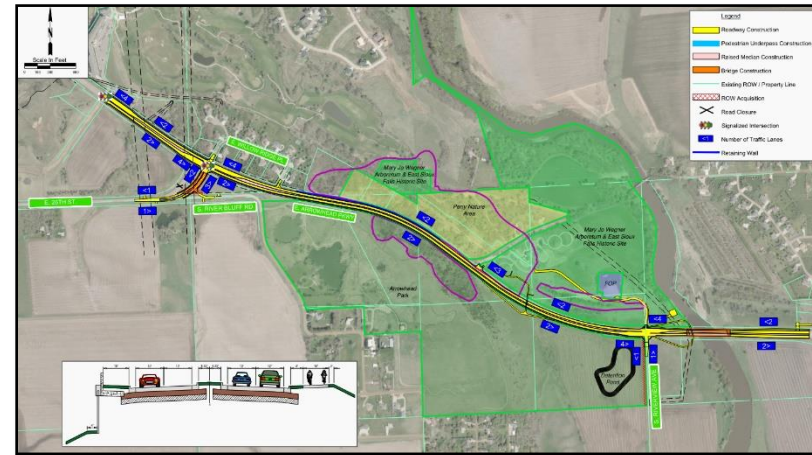

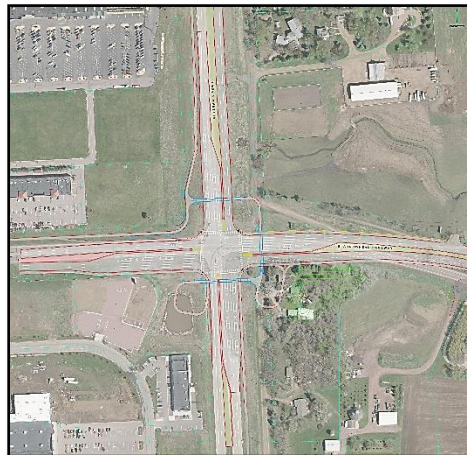

Phase 3 from the Willow Run entrance to the Big Sioux River is also planned for construction in 2025-2026. The design on this phase is progressing and right of way acquisition is slated to begin in September 2023.

This project will involve detours and the full closure of the Arrowhead Parkway corridor for rock blasting, installing a retaining wall, and widening the bridge over the Big Sioux River.

The Mary Jo Wegner Arboretum and Arrowhead Park will remain open during construction.

We appreciate your patience as we are working through design and right of way certification on the remaining phases of the Arrowhead Parkway corridor.

If you have any questions for current and future phases of the project, please contact the team members listed on the left or visit the website linked below.
