

Project Information

The City of Sioux Falls is planning to reconstruct Minnesota Avenue from Russell Street to 18th Street. This project will transform Minnesota Avenue into a lively, secure, distinctive corridor that better serves the community and all who visit. This process will happen in phases—one segment of the corridor at a time. Throughout each of these stages, public input will be requested to help shape the project.

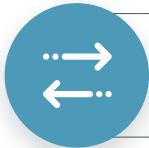

PROJECT NEEDS

More lighting for safety

Update aging water main and infrastructure

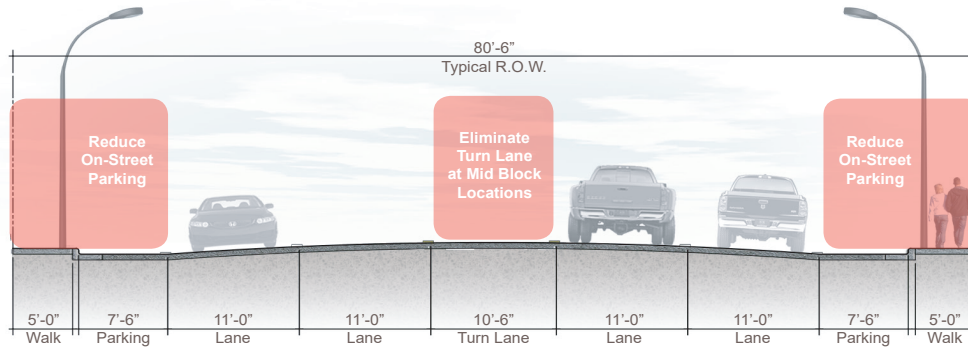

Updated and consolidated access

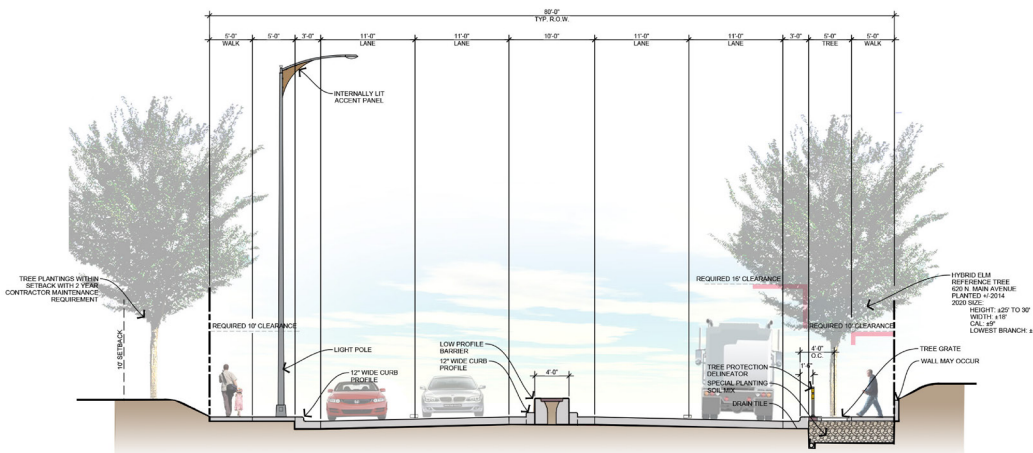

Enhanced aesthetics such as trees, benches and new bus stops

EXISTING ROAD SECTION

PROPOSED ROAD SECTION - PRELIMINARY DESIGN
