

Roadway Lighting

Design Policies

1.1 Furnishing and Installation Delegation

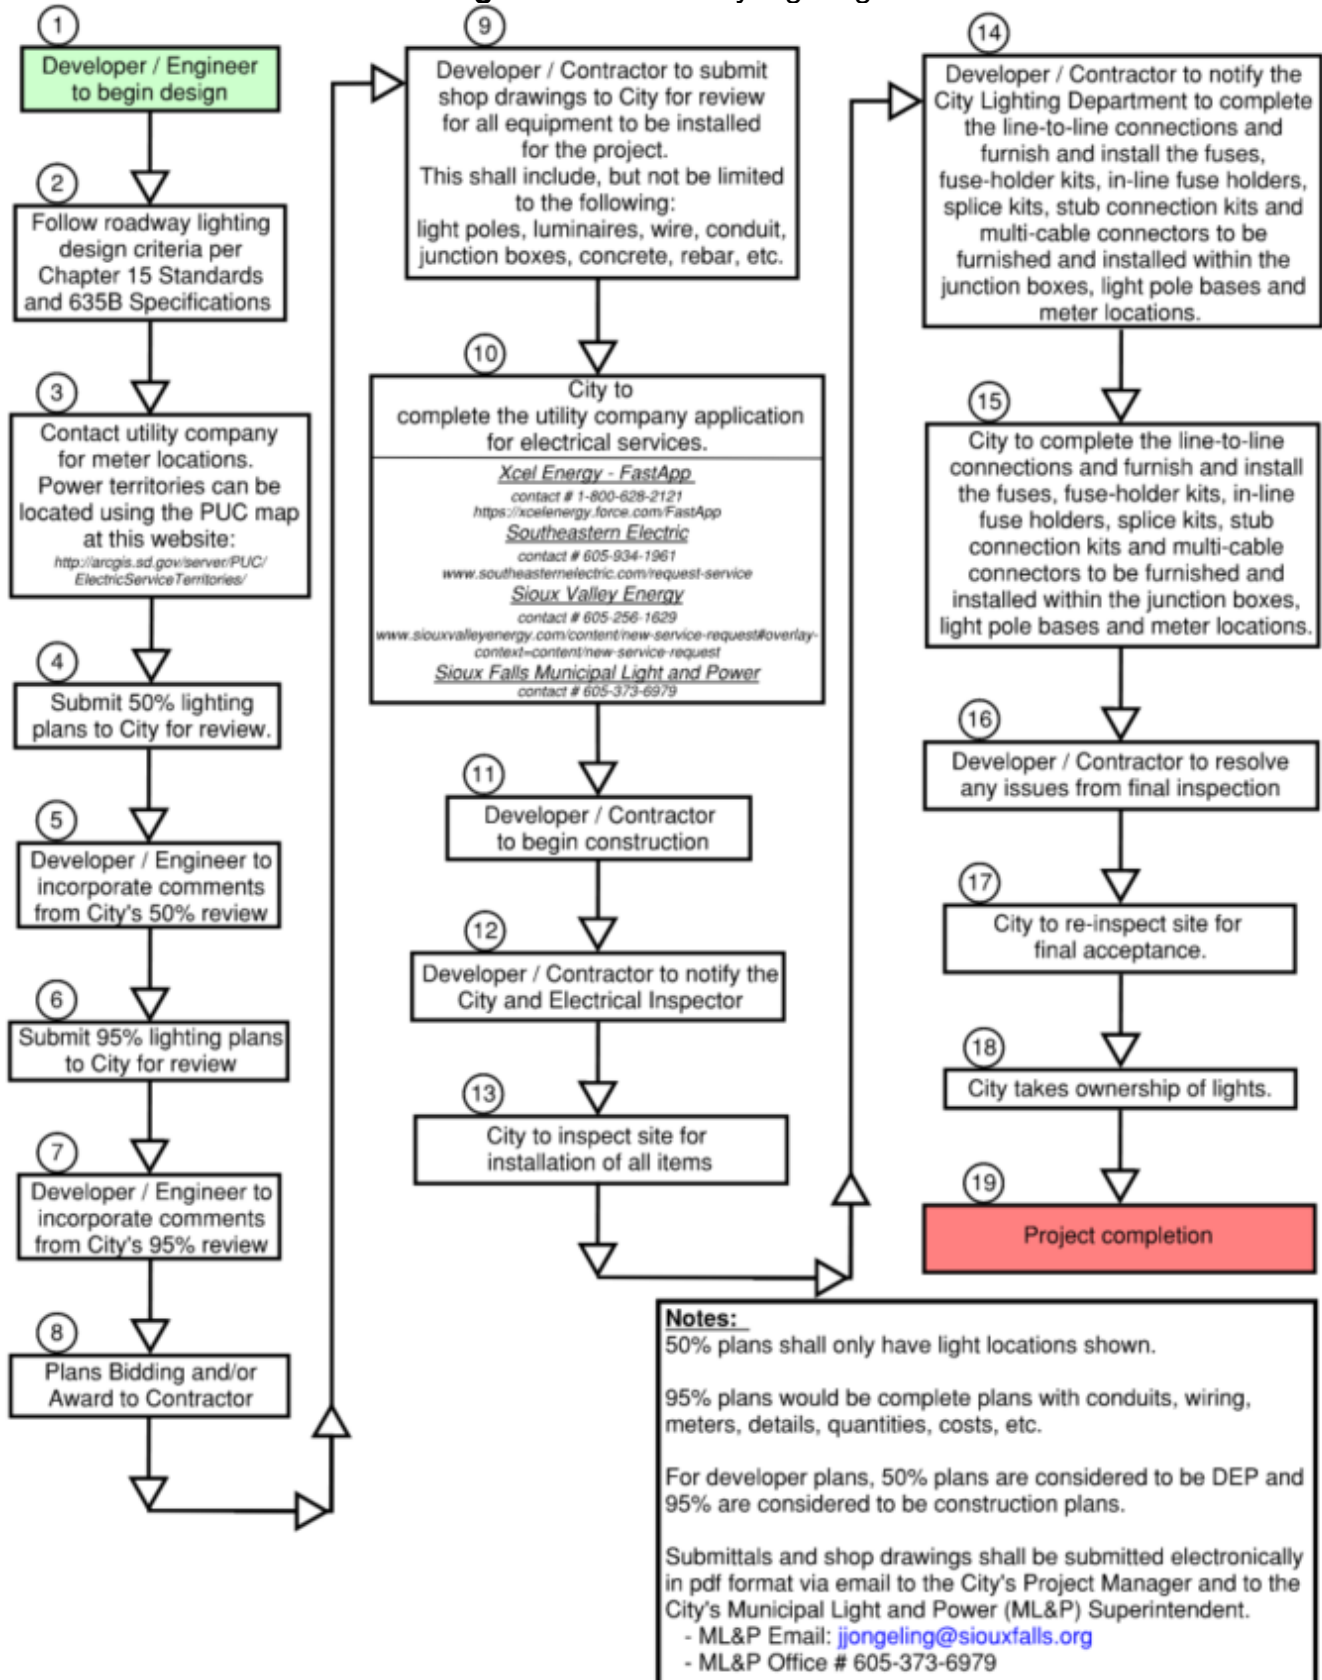

1.1.1 Materials for roadway lighting shall be furnished and installed as shown below.

Table 1-1: Roadway Lighting Material Furnish and Install Standard (Table is applicable to Developer and CIP projects)					
Material	City Furnish	Contractor Install	Contractor Furnish & Install	City Furnish & Install	Power Supplier
All City Streets					
Meter Pedestal & Breakers			X		
Meter					X
Conduit			X		
Wire in Conduit			X		
Junction Box			X		
Concrete Footings			X		
Breakaway Bases			X		
Luminaire Pole			X		
LED Luminaire & Photo Eye			X		
Locator Ball			X		
Fuses/Connectors for Wiring				X	

1.2 Design and Construction Process

1.2.1 A flow chart is shown below that outlines the process of the roadway lighting from design through construction.

Figure 1-1: Roadway Lighting Flow Chart

1.3 Light designs for under bridge and tunnels (pedestrian underpasses)

1.3.1 Luminaires for under bridge and tunnels shall be as follows or approved equal.

Luminaire	Watts	Type	Manufacturer	Model #
Tunnel	17	3	Hubbell	LNC-7LU-3000K
Under-Bridge (over local roadways)	39	3	Holophane	W4GLED-10C1000-40K-T3M
Under-Bridge (over collector and arterial roadways)	104	3	Holophane	W4GLED-30C3000-40K-T3M

1.4 Meter Pedestals

1.4.1 The City shall be responsible for completing the application process with the local power companies for the meter installation.
